

San Francisco 24/3 66.

Prof. Dr. A. Gray Cambridge

My dear Sir,

Your favor  
of Febr 23<sup>rd</sup> has been duly received.  
I thank you most sincerely for  
the information given.

You astonish me by stating, there  
are some new plants in my last  
spring collection, for I never yet  
came home less satisfied with  
my results than that time.

*Aphanochaeta exilis* covers near  
Arbun a large tract of land,  
so does the *Balsamorhiza* and  
still more that new sp. of *Peo-  
nunculus*; the larger specimens  
of it under a higher number are
